WORK PROGRAMME AND BUDGET FOR EPID FOR THE 1975/76 (1968 E.C.)

FISCAL YEAR

Introduction

The Work Programme and Budget for the 1975/76 (1968 E.C.) fiscal year is based primarily on EPID's Loan Application to IBRD (EPID Publication No. 6), the IBRD Appraisal Report on the Minimum Package Programme, and EPID's plans for the 1975/76 - 1979/80 period as set forth in EPID Publication No. 20.

In the 1975/76 fiscal year EPID will undergo some organizational changes. Prominent among these is the initiation of Co-operative Marketing Division at EPID Headquarters incorporating the former Marketing & Credit Section and the Co-operative Section in addition to three new sections. These new units are yet fully non-existent, and it is evident that their budget estimates therefore are somewhat uncertain relative to already established units. The Co-operative Marketing Division is expected to receive all its budgetary support and most of its technical assistance support from SIDA, although FAO and USAID are also expected to provide technical assistance to the division. Another organizational change relates to the creation of a Soil and Water conservation Section within the Extension Division at EPID Headquarters. This unit incorporates the former Soil Conservation Division of the Ministry of Agriculture which was transferred to EPID in September 1974. However, since this transfer at that time was said to be temporary, and since these budget proposals then were already

completed, the funds provided for the Soil and Water Conservation Section in this budget do not include the Recurrent Budget of the former Soil Conservation Division where most of the personnel costs are provided for.

A third organizational modification relative to the 1974/75 budget is the considerable strengthening of the Regional Co-ordinating Units. There will in 1975/76 be eight such units each able to function as an effective focal point for EPID field activities within its region. Provision is made for technical assistance to several of these units and for a delegation to them of some of the functions, e.g. accounting, now being carried out centrally at EPID Headquarters.

EPID has in 1975/76 assumed the managerial and operational responsibility for the Southern Region Agricultural Development Project (SORADEP) which has been fully integrated into the EPID/MPP structure. However, SORADEP has been allowed to retain its special characteristics, including a heavy reliance upon low level field workers or demonstrators, and the project is therefore expected to maintain a certain degree of independence within EPID's network of field areas.

This 1975/76 Work Programme and Budget covers only EPID's regular activities as outlined, inter alia, in the original project documents mentioned in the introductory paragraph. It does not include the various short and medium term rehabilitation activities in which EPID is or will be engaged, nor does it include the extraordinary tasks entrusted to EPID in connection with the implementation of the land reform. Funds for all of these activities are contributed and programmed over and above EPID's regular budget.

EPID's total budget cost in the 1975/76 fiscal year is shown on page 155 but is recapitulated below:

Eth. Government Capital Budget	\$3,553,629
Eth. Government Recurrent Budget	<u>\$478,800</u> \$4,032,429
IDA Credit No. 416 ET	\$9,822,280
SIDA, in kind	\$1,227,000
SIDA, in cash	<u>\$867,557</u> \$2,094,557
FAO (UNDP - DANIDA), in kind	\$706,200
USAID, in kind	\$468,000
ODM, in kind	<u>\$73,800</u>
T o t a l	\$17,197,266 =====

A standard pro forma cost of Eth.\$6,500 per man-month or Eth. \$78,000 per man-year has been used in costing expatriate technical assistance personnel. It is clear that this cost is but a rough estimate and that some donor agencies may use costs that are at considerable variance with this standard cost. To the extent that this is the case the total project cost of Eth.\$17.2 million, as shown above, would naturally change. However, since technical assistance is usually provided on a per post basis and not on the basis of specific costs, this was considered to be of little practical consequence for the purpose of EPID's budget.

In keeping with the exclusion of all costs related to the rehabilitation programme, as mentioned above, a number of posts for expatriate personnel working mainly or wholly with rehabilitation activities are not shown in this budget.

At the time when this document was being completed and duplicated it was not yet clear whether the projects executed for

EPID by FAO in 1975/76 would be financed mainly by DANIDA, as in the past, or by UNDP.

The major constraint affecting EPID's expansion in the 1975/76 fiscal year will be the shortage of supervisory field personnel prompted by the closing of all high level training institutes in Ethiopia for the student campaign. Mainly for this reason, but also because of management and manpower constraints at Headquarters, it has not been possible for EPID to maintain its past rate of geographical expansion. The summary below illustrates the total number of EPID field areas in 1974/75 and in 1975/76 as shown by Annex I on page 156:

	<u>1974/75</u>	<u>1975/76</u>
MPPA	48	55
DA	26	18
OA	28	5
Extension areas/centres	347	351

The modest expansion that has been possible in 1975/76 has been made possible by a consolidation of DAs and OAs into full-scale MPPAs in order to reduce the needs for supervisory staff. In addition, the 1975/76 figures include SORADEP which alone is estimated to correspond to two MPPAs or 12 extension areas.

However, it should also be stressed that as many as about 20 of the centres established in 1974/75 were little more than temporary distribution centres established for the rehabilitation programme and closed after the completion of this programme.

Several of the field areas established in drought affected parts of Ethiopia for the rehabilitation programme have in 1975/76 been either closed or consolidated into larger MPPAs.

The first 1975/76 budget estimates were prepared for a total of 342 centres or 55 MPPAs, including SORADEP. At the time of the Ethiopian Government budget hearings in February 1975 it was apparent that it would be realistic to reduce these figures in view of the field staff shortage likely to affect EPID in 1975/76. The finally approved figures shown in this budget therefore relate to only 50 MPPAs and 317 centres. There would thus appear to be a shortfall of 5 MPPAs and 34 centres.

However, in the light of past experience EPID should be able to absorb the cost for these additional field areas within the provisions shown in the budget. Virtually all of the new areas to be established in 1975/76 will be created from mergers with former areas and therefore do not require any large initial investments. In addition, many of the field staff positions budgeted for are unlikely to be filled due to the shortage of trained personnel. The funds provided in the budget for field areas are therefore estimated to suffice for the number of areas indicated in Annex I of this document.

As usual, the overriding problem when preparing EPID's budget estimates is that they have to be prepared so far in advance that it is at that time difficult to predict accurately the scope of the field activities. The 1975/76 budget has to be submitted to the Ethiopian Government already by September 1974, after which time upward revisions are difficult to make. In September 1974 the number of field areas for the 1975/76 year cannot be known with a high degree of accuracy.

The 1975/75 budget has been discussed and approved by the Ministry of Planning and Development of the Ethiopian Government in February 1975. The figures shown in this document are therefore expected to be final as regards Ethiopian Government contributions.

The work programme (Budget Form 1), the personnel costs (Budget Form 2), and the purchasing costs (Budget Form 3) are all shown together for each organizational unit. Summaries of the personnel costs, the purchasing costs, and of total costs and financing follow on Budget Forms 4 - 6. Annex I shows the number of field areas per province that EPID will have in the 1975/76 fiscal year, Annex II provides a schedule of all expatriate staff assignments to EPID in that year.

Only summaries of the personnel costs are shown on Budget Form 2. A more detailed breakdown of the personnel costs indicating each post for every organizational unit will be prepared and distributed for internal use within EPID.

1. Crop Protection Unit and Grain Storage												
2. Establish a basic entomology laboratory												
3. Assess storage pests and losses due to such pests												
4. Develop and disseminate methods for reducing storage losses												
5. Identify crop pests and diseases in the field and recommend remedial measures												
6. Maintain systematic records on crop pests and diseases												
7. Supervise emergency crop protection operations												
8. Construction of improved on farm storage												

D. Crop Protection Unit and Grain Storage

1. Establish a basic entomology laboratory

2. Assess storage pests and losses due to such pests

3. Develop and disseminate methods for reducing storage losses

4. Identify crop pests and diseases in the field and recommend remedial measures

5. Maintain systematic records on crop pests and diseases

6. Supervise emergency crop protection operations

7. Construction of improved on farm storage

Enable the identification of control measures against pests and crop diseases

Develop an accurate assessment of present storage losses in traditional stores as well as in EPID's improved MC stores

Reduced storage losses in the 120 improved MC stores

Provide effective crop protection service within EPID field areas

Establish a body of reference data

Meet emergency outbreaks of crop pests

Construct 250 improved farm stores

PROJECT:	ORGANIZATIONAL UNIT:	PAGE:
AFID/KPP	FIELD MANAGEMENT SECTION	1.
DESCRIPTION OF ACTIVITIES	PRODUCTION TARGETS (quantify if possible)	TIME SCHEDULE
1. Plan and supervise the handling of agricultural inputs and their distribution to farmers from the marketing centres/co-operative societies	Ensure that those inputs indicated under the Sales & Purchase Section are efficiently handled, stored and distributed in the field areas	J A S O N D J F M A M J
2. Provide technical guidance to field staff and to co-operative societies	Monitor on a continuous basis all marketing and credit aspects of the field work and provide advice and guidance as required	
3. Study the current marketing channels for pulses and recommend actions designed to reduce marketing costs	Establish two purchasing stations for pulses; submit a plan for future actions to be undertaken in pulses marketing	
4. Supervise the operation of the credit programme	Collect credit granted in the 1975 season to approx. 75,000 farmers of totally about E\$3.4 million. Provision of credit to 100,000 farmers in 1976. Achieve a final delinquency rate of no more than five per cent of all credit granted	

PROJECT:	ORGANIZATIONAL UNIT:	PAGE:
EPID/MPP	FIELD MANAGEMENT SECTION	2 ---
DESCRIPTION OF ACTIVITIES	PRODUCTION TARGETS (quantify if possible)	TIME SCHEDULE
5. Participate in staff training	Training courses and seminars as established by the Training Officer	J A S O N D J F M A M J
6. Assist the co-operative societies in the purchasing, handling and storage of grains	Assist in the purchase of about 10,000 tons of grains	
7. Participate in the planning for the expansion of EPID activities	Participate in the planning for the establishment of ten additional MPPAs
